

I have been a subscriber to XM Satellite Radio for more than a year, during which time I have benefitted from its extraordinary variety of excellent programming unparalleled in public access broadcasting. More recently I have been greatly served by XM Satellite Radio's traffic and weather channels. I support these services through paid subscription, and do not feel that the National Association of Broadcasters (NAB) should be given any power to dictate what I can and cannot receive through mediums such as XM Satellite Radio. With respect, I sincerely urge the Federal Communications Commission to reject the NAB's petition 04-160. Instead I ask you to support the ability of services such as XM Satellite Radio to provide radio programming which I and other citizens enjoy, demand and deserve. Thank you.
